

AI ENABLED EAP FOR METAL PROCESSING

HOW EAP IS EASY WITH FORMEZY?

Formezy - Beyond ERP for Metal Processing

While ERP manages operations, Formezy (EAP) goes further - bringing agility, control, and real-time visibility to complex engineering processes. It unifies workflows, projects, and data on a single platform, enabling scalable and efficient operations across organizations of any size.

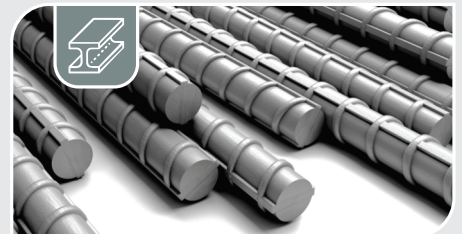

WORKS WITH MULTIPLE INDUSTRIES

Tube & Pipes

Coil & Sheets

TMT & Bars

Flanges

Coated Sheets

Fastners

INDUSTRY CHALLENGES

Heat Number
Management &
Traceability

Scrape Analysis

Operator &
Stoppage
Analysis

Variance Analysis -
Yield, Standards
and Efficiency

Multiple UoM - i.e.
Ton, Meter, etc

Budgeting & Cost
Center Accounting

Production Cost
Analysis

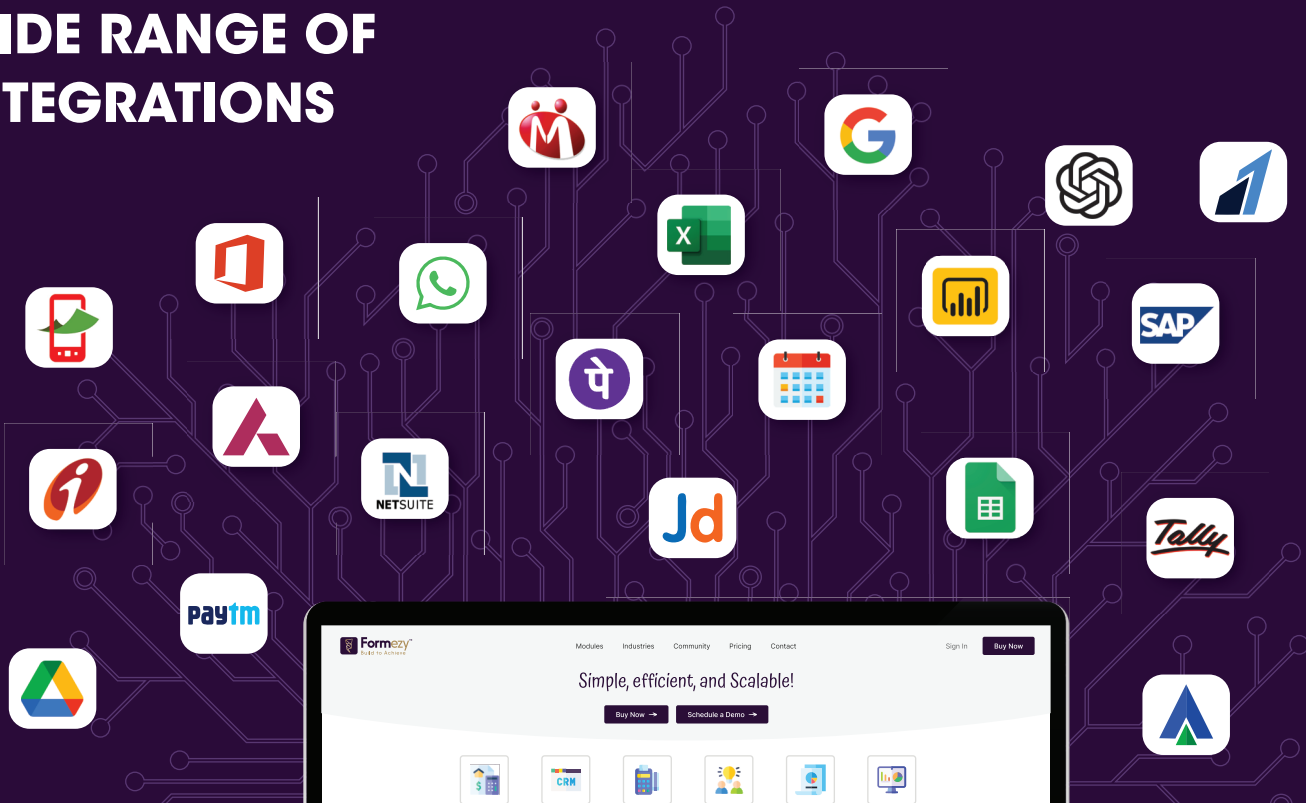

Material, Manpower
and Machine
Traceability

EAP vs ERP: Simplifying the Future of Business Management

EAP (Enterprise Application Platform)	Category	ERP (Enterprise Resource Planning)
Flexible & modular structure	Architecture	Centralized & rigid system
Easily scales with growth	Scalability	Limited scalability
Drag-drop, highly customizable	Customization	Time & cost intensive
Quick & simple setup	Implementation	Long, complex process
Easy with other tools	Integration	Limited/complex integrations
Lower ownership cost	Cost	High setup & maintenance
Supports low/no-code	Development	Requires technical resources
Adaptive & responsive	Agility	Slow to change
Suited for modern needs	Industry Suitability	Best for traditional setups
Flexible with room to innovate	Standardization	Strict standard processes
Built-in & centralized	Document Management	Uses external tools
In-built collaboration tools	Communication Management	Depends on external tools

WIDE RANGE OF INTEGRATIONS

PRODUCT OF,

SAFAL
INFOSOFT LIMITED

An ISO 27001:2013 Certified Company

Our Presence : India • UAE • USA
